

ENVIRONMENTAL POLICY STATEMENT

Company	Crearomatic, S.L.
Code / revision	Environmental Policy - Rev. 2026
Date of update	23 July 2026
Approval	Management

1. Environmental commitment

Crearomatic, S.L. undertakes to progressively reduce the environmental impact associated with its activities, products and processes. The organisation will work to improve its environmental performance, prevent pollution and develop initiatives that help minimise its environmental footprint.

This commitment extends to customers, personnel, suppliers, collaborators and the local community, and is integrated into the company's day-to-day management.

2. Principles of action

Crearomatic undertakes to:

- Comply with applicable environmental regulations and other requirements voluntarily adopted by the organisation.
- Prevent pollution whenever technically, operationally and economically possible.
- Minimise waste generation and promote its segregation, reuse, recycling and management through authorised operators.
- Reduce and optimise energy and water consumption in facilities and processes in order to conserve natural resources.
- Purchase, as far as possible, products and services with a lower environmental impact.
- Train and raise awareness among personnel on good environmental practices, efficient use of resources and impact prevention.
- Communicate the company's environmental commitment to customers, personnel and the community where appropriate.
- Continuously improve environmental performance by measuring relevant impacts and setting reduction or control objectives.

3. Monitoring and continuous improvement

The company will periodically monitor consumption, waste and relevant environmental aspects in order to assess their evolution and establish improvement actions. This statement shall be periodically reviewed by Management to ensure its validity and suitability for the organisation's activity.
